

InnerWireless Healthcare Customer Receives Prestigious Award For Adopting And Applying Innovative Technologies

Methodist Health System wins Tech Titans Technology Adopter Award from the Metroplex Technology Business Council

RICHARDSON, Texas – Aug. 29, 2006 – InnerWireless[®], Inc. today announced that Dallas-based customer Methodist Health System has won the Metroplex Technology Business Council's (MTBC) prestigious Tech Titans Technology Adopter Award for the health system's wireless strategy, including implementing the Medical-grade Wireless Utility from InnerWireless. The Technology Adopter category recognizes outstanding adoption and application of innovative technologies that successfully change outcomes and impact results.

"InnerWireless is honored to partner with Methodist Health System, an exemplary and forward-thinking organization that explores all options for enhancing patient care," said Chris Click, Vice President of Marketing. "It is clear that Methodist Health System's primary goal is to ensure that its patients receive the best care possible, which mirrors InnerWireless' goal of providing the best technology available to hospitals for the overall improvement of healthcare."

Methodist Health System is currently installing InnerWireless' Medical-grade Wireless Utility to support the use of multiple wireless devices and applications such as electronic medical records, bedside medication administration, wireless PCs and wireless phones. The Medical-grade Wireless Utility guarantees wireless coverage for these devices, thereby reducing delays in patient care that can occur with conventional communications.

InnerWireless has installed and deployed its Medical-grade Wireless Utility into a distinguished group of more than 60 leading hospitals and health systems – including Vassar Brothers Medical Center; Children's Memorial Hospital of Chicago; The University of Chicago Hospitals and Health System's Bernard A. Mitchell Hospital and Comer Children's Hospital; and the National Institutes of Health's Mark O. Hatfield Clinical Research Center.

About InnerWireless

InnerWireless, Inc. guarantees wireless coverage inside hospitals and healthcare-related facilities ranging in size up to 10 million square feet with its Medical-grade Wireless Utility, a unified, broadband wireless distribution platform. Engineered to support a full range of wireless services and applications, the Medical-grade Wireless Utility enables wireless systems essential for interpersonal communications, clinical operations, and building operations. In addition, InnerWireless has launched Spot to provide wireless, high-assurance location tracking for hospital assets, clinical staff and patients.
