

Mount Airy Casino Resort Brings Added Luxury To Guests With In-Building Wireless System From InnerWireless

InnerWireless system guarantees wireless connectivity for guests, staff and first responders

RICHARDSON, Texas – Jan. 6, 2009 – InnerWireless[®], Inc., the premier provider of in-building Converged Wireless solutions, today announced that it has fully deployed its broadband Horizon[™] system at Mount Airy Casino Resort in Mount Pocono, Pa., to deliver guaranteed coverage to guests and ensure first responder and staff communications. Mount Airy chose InnerWireless' system because of its layered WLAN architecture, reliable delivery of PCS/cellular service, and proven success in other casinos and luxury hotels. With InnerWireless, guests can use their cell phones across more than 400,000 square feet of world-class accommodations and can enjoy free Wi-Fi from the comfort of their rooms.

“I worked with InnerWireless during my tenure at another high-end casino, so when Mount Airy needed a distributed antenna system to comply with state-mandated safety requirements, I knew InnerWireless was the perfect fit and would deliver the results we wanted,” said Leo Hornbaker, technical services manager for Mount Airy. “With InnerWireless, we can layer different applications on separate channels so they don’t conflict. This unique layered approach provides the capacity and robust bandwidth needed to ensure that guests, staff and first responders have connectivity for all of their wireless needs.”

Located in the Pocono Mountains, about 100 miles west of New York City, Mount Airy offers a casino, full-service spa, nightclub, conference and business center, and five restaurants. InnerWireless' Converged Wireless solution ensures abundant coverage and signal strength for cell phones across the entire facility, while also delivering free Wi-Fi in over 200 of the casino's luxury guest rooms. Mount Airy also leverages InnerWireless' distributed antenna system (DAS) for its VoIP phones to improve staff communications and streamline operations.

“We’re proud to ensure that destinations like Mount Airy meet first responder communication requirements while providing wireless amenities for all guests. And in today’s environment, it’s critical for guests and staff to have access to their wireless services, so that’s why InnerWireless is focused on delivering premium wireless coverage,” said Jim McCoy, chief technology officer of InnerWireless. “In addition to delivering a quality guest experience, Mount Airy has improved staff communication, operations and workflow.”

InnerWireless has more than 22 million square feet of gaming, hotel and convention space under contract in Las Vegas and other markets such as Mississippi, Connecticut and Pennsylvania.

About InnerWireless

InnerWireless is the premier end-to-end in-building wireless solution provider for healthcare, enterprise, hospitality/gaming and government markets. With Horizon™ – a broadband, Converged Wireless platform – InnerWireless ensures the delivery of Wireless Wide Area Networks (WWAN) and Wireless Local Area Networks (WLAN) services including cellular/PCS, fire/life/safety, Wi-Fi and medical telemetry – guaranteed. Designed expressly for mission- and life-critical wireless applications, Horizon’s comprehensive, single antenna infrastructure enables pervasive coverage and optimized capacity with an eco-friendly “green” design and an industry leading warranty. InnerWireless also collaborates with key industry partners to enable the delivery of turnkey solutions. As a Cisco Premier Certified Partner, specializing in Wireless LAN technology, InnerWireless provides and supports Cisco WLAN solutions. As an AeroScout Gold-Level Value-Added Reseller, InnerWireless can deliver the latest in location-based solutions. With a complete end-to-end solution, InnerWireless helps achieve a new and lasting degree of wireless freedom. For more information about InnerWireless, visit www.innerwireless.com.
