

InnerWireless Broadens Suite of In-building Wireless Solutions by Adding ADC InterReach Fusion Product Line

Enterprises now have access to InnerWireless' expertise across a distributed antenna system portfolio that economically meets all in-building needs, from carrier-only solutions to converged wireless solutions

CHICAGO – April 7, 2009 – InnerWireless[®], Inc., the premier provider of in-building converged wireless solutions, today announced that it has broadened its product portfolio to include ADC's InterReach Fusion[®] line. With Fusion, InnerWireless can now bring carrier-only wireless solutions to every healthcare enterprise in North America regardless of the scope, complexity or price point of their project. InnerWireless is the only one-stop-shop for enabling complete wireless coverage in the enterprise, and the combination of InnerWireless' deep wireless professional services expertise with healthcare, hospitality and Fortune 100 companies, coupled with its broadened product line, creates an unparalleled value proposition.

InnerWireless continues to partner with best-in-class solution providers, including ADC, to offer turnkey mobility solutions. The Fusion product line is a carrier-optimized multi-band distributed antenna system (DAS) that leverages standard building cabling and provides dedicated in-building coverage, capacity and monitoring for selected cellular carriers.

“We recognize that enterprises have many different in-building wireless coverage needs, even from building to building. Over the past 10 years, InnerWireless has led the market with its converged, multi-service platform. By adding the Fusion solution to our Horizon family of in-building solutions, we match up well with customers who, from a price-performance perspective, want a carrier-specific solution either as a standalone deployment or as part of a broader converged wireless deployment,” said Kevin Swank, director of marketing at InnerWireless. “With the addition of InnerWireless extensive professional services for planning, design, deployment and ongoing support, no wireless company or technology reseller can offer a wireless assurance value proposition on par with InnerWireless.”

InnerWireless' portfolio of DAS solutions now includes:

- **Horizon Converged** – InnerWireless' comprehensive wireless platform for the delivery of all WWAN and WLAN services, including multi-carrier cellular services, Wi-Fi and specialized applications such as medical telemetry.
- **Horizon Advantage** – the ideal wireless platform for delivery of multiple WWAN-oriented carrier services and fire/life/safety.
- **Horizon Fusion** – the ideal solution for delivering optimized WWAN carrier services.

“With ADC joining other product lines within our portfolio, InnerWireless can provide literally any wireless service to hospitals economically and in a single-source relationship,” said Ed Cantwell, president, CEO and chairman of InnerWireless. “First and foremost, InnerWireless is a solutions provider, and we have demonstrated that by adding best-of-breed wireless solutions to our offerings. By combining the best wireless products from both InnerWireless and our partners with our experience making wireless work in hospitals, we believe that InnerWireless represents a profound value and a better way of bringing wireless to hospitals no matter their size or needs.”

“This partnership with InnerWireless brings significant new opportunities for deployment in North American healthcare facilities of our Fusion product,” said John Niedermaier, vice president, Network Solutions Business Unit for ADC. “As a leading provider of converged wireless solutions, InnerWireless delivers a comprehensive suite of mission- and life-critical applications to hospital customers.”

Supporting a broad spectrum of WWAN and WLAN services, including 3G+ cellular, two-way radios, paging, 802.11 a/b/g/n, and whole-house medical telemetry optimized for voice, location and data, the Horizon product line ensures seamless integration with advancing technologies and applications, while providing a secure wireless future for the hospital.

InnerWireless is in booth # 3948 at the 2009 Annual HIMSS Conference and Exhibition

Visit InnerWireless at booth # 3948 to learn more about its partners and experience the converged wireless hospital in action. InnerWireless executives will be on-hand to discuss how your hospital can accelerate adoption of the right kind of wireless solution for your hospital.

About ADC Network Solutions

ADC's [Network Solutions](#) Business Unit offers products that deliver high-performance wireless coverage and capacity to business and consumer subscribers in any indoor or outdoor location. ADC is the global leader in advanced in-building wireless solutions and compact network systems, and is a leader in solutions that enhance coverage in macro networks.

About ADC

ADC provides the connections for wireline, wireless, cable, broadcast, and enterprise networks around the world. ADC's innovative network infrastructure equipment and professional services enable high-speed Internet, data, video, and voice services to residential, business and mobile subscribers. ADC (NASDAQ: ADCT) has sales into more than 130 countries. Learn more about ADC at www.adc.com.

About InnerWireless

InnerWireless is the premier end-to-end in-building wireless solution provider for healthcare, enterprise, hospitality/gaming and government markets. With Horizon™ – a broadband, Converged Wireless platform – InnerWireless ensures the delivery of Wireless Wide Area Networks (WWAN) and Wireless Local Area Networks (WLAN) services including cellular/PCS, fire/life/safety, Wi-Fi and medical telemetry – guaranteed. Designed expressly for mission- and life-critical wireless applications, Horizon’s comprehensive, single antenna infrastructure enables pervasive coverage and optimized capacity with an eco-friendly “green” design and an industry leading warranty. InnerWireless also collaborates with key industry partners to enable the delivery of turnkey solutions. As a Cisco Premier Certified Partner, specializing in Wireless LAN technology, InnerWireless provides and supports Cisco WLAN solutions. As an AeroScout Gold-Level Value Added Reseller, InnerWireless can deliver the latest in location-based solutions. With a complete end-to-end solution, InnerWireless helps achieve a new and lasting degree of wireless freedom. For more information about InnerWireless, visit www.innerwireless.com.
