

InnerWireless Approved as GSA Schedule 70 Vendor

Government agencies, including military health system facilities and VA hospitals, now able to procure and implement the latest in-building broadband DAS from InnerWireless

RICHARDSON, Texas – July 7, 2009 – InnerWireless[®], Inc., the premier provider of end-to-end in-building converged wireless solutions, today announced its award of a General Services Administration (GSA) MAS contract number GS-35F-0477V, enabling the company to do business directly with the Federal Government through the GSA Information Technology (IT) Schedule 70. InnerWireless' Horizon™ Converged Wireless solution, also known as a distributed antenna system (DAS), is now available on the GSA IT Schedule 70.

U.S. government agencies utilize the GSA IT Schedule 70 to directly access commercial products and services through qualified vendors who can meticulously address the needs of the government IT community. With the federal government's Cooperative Purchasing Program, InnerWireless' solutions and services will also be available for state and local government entities to procure from Schedule 70 through the Special Item Number (SIN) 132-53, which is the category for Wireless Services.

“Our high performance and ultra-reliable DAS solutions are already known to many federal agencies through our successful installations at the U.S. Department of Transportation headquarters in Washington, D.C., The National Institutes of Health in Bethesda, Maryland, and the U.S. Food and Drug Administration Consolidation Campus in White Oaks, Maryland,” said Ed Cantwell, president, CEO and chairman at InnerWireless. “Through the GSA Schedule 70, many more government agencies, including those who provide healthcare to active military and veterans, will be able to select our wireless platform for buildings and medical facilities that require the latest in-building wireless coverage and capacity capabilities. InnerWireless is also a compelling solution when undertaking major healthcare initiatives such as Electronic Medical Records requiring ubiquitous wireless coverage in existing facilities.”

Many of today's government buildings were built long before the development of wireless technology, and as more government employees depend on wireless devices, including BlackBerry devices, 3G Smartphones, cell phones, and Wi-Fi enabled medical devices as part of their daily work routines, federal agencies are building new facilities or performing major renovation to include InnerWireless' DAS technology. With guaranteed coverage and signal strength and solid engineering and design, InnerWireless' Horizon Converged Wireless solution is the only turnkey solution ready and proven for deployment throughout multiple governmental agencies, particularly within healthcare facilities such as VA hospitals and military health system facilities.

InnerWireless Added to GSA Schedule 70/Page 2

Under the GSA Schedules (also referred to as Multiple Award Schedules and Federal Supply Schedules) Program, GSA establishes long-term, government-wide contracts with commercial firms to provide access to commercial supplies (products) and services that can be ordered directly from GSA Schedule contractors or through GSA Advantage (www.gsaadvantage.gov), the GSA online shopping and ordering system. GSA Schedules offer government customers direct access and delivery of millions of state-of-the-art, high-quality commercial supplies and services at volume discount pricing.

Government customers can access information about InnerWireless through the GSA Schedules e-Library by searching the contract number (FSS) GS-35F-0477V. The GSA application and process for InnerWireless was facilitated by The Washington Management Group in Washington, D.C.

About GSA

General Services Administration (GSA) is a federal agency that provides a centralized delivery system of products and services to the federal government, leveraging its enormous buying power to get the best value for taxpayers. Founded in 1949, GSA managed more than 11 percent of the government's total procurement dollars and \$24 billion in federal assets, including 8,600 government-owned or leased buildings and 213,000 vehicles. GSA helps preserve our past and define our future, as a steward of more than 480 historic properties, and as manager of USA.gov, the official portal to federal government information and services. GSA's mission to provide superior workplaces, expert technology solutions, acquisition services, purchasing and E-Gov travel solutions and management policies, at best value, allows federal government agencies to focus on their core missions.

About InnerWireless

InnerWireless is the premier end-to-end in-building wireless solution provider for healthcare, enterprise, hospitality/gaming and government markets. With Horizon™ – a broadband, Converged Wireless platform – InnerWireless ensures the delivery of Wireless Wide Area Networks (WWAN) and Wireless Local Area Networks (WLAN) services including cellular/PCS, fire/life/safety, Wi-Fi and medical telemetry – guaranteed. Designed expressly for mission- and life-critical wireless applications, Horizon's comprehensive, single antenna infrastructure enables pervasive coverage and optimized capacity with an eco-friendly "green" design and an industry leading warranty. InnerWireless also collaborates with key industry partners to enable the delivery of turnkey solutions. As a Cisco Premier Certified Partner, specializing in Wireless LAN technology, InnerWireless provides and supports Cisco WLAN solutions. As an AeroScout Gold-Level Value Added Reseller, InnerWireless can deliver the latest in location-based solutions. With a complete end-to-end solution, InnerWireless helps achieve a new and lasting degree of wireless freedom. For more information about InnerWireless, visit www.innerwireless.com.
